

Operating System Dependent Interface

Operating System Dependent Interface

Operating System Dependent Interface

OSDI Acronym Definition

What does OSDI stand for?

The acronym **OSDI** stands for **Operating System Dependent Interface** anywhere that links here.

To find other possibilities for the [meaning of OSDI](#) , look up the [OSDI acronym](#) in the [list of acronyms starting with "O"](#).

If you use this [HTML code for acronyms](#) the intended meaning of the acronym will displayed by a pop-up tool-tip whenever anyone positions their mouse over the acronym. It also indicates to text-to-speech (auditory) browsers how to correctly pronounce the acronym.

For verbal rendering, the [pronunciation](#) of the OSDI acronym should be:

o s d i

This information can be provided to auditory browsers using either an [extended link](#) or [embedded RDF metadata](#).

This is an automatically-generated printer-friendly PDF version of the HTML web page at [Operating System Dependent Interface](#) ← CLICK HERE to get the standard HTML version of this document.

Operating System Dependent Interface Usage

HTML for OSDI Acronym

when OSDI means Operating System Dependent Interface

New! Now updated with the inheritance rules for the [title attribute](#) in [HTML 5](#)

The easiest way to create HTML code indicating that the acronym **OSDI** stands for **Operating System Dependent Interface** is to simply include the acronym in an HTML `<a>` tag and an abbreviation tag (not an [acronym tag](#)):

```
<a href="http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface/" title="Operating System
Dependent Interface"
onclick="if (confirm('OSDI stands for Operating System Dependent Interface')) return false;"
>
<abbr>OSDI</abbr>
</a>
```

This is the recommended code for both HTML 4 browsers and HTML 5 browsers. Some browsers, most notably IE, do not activate help when the title attribute is coded on the `<abbr>` tag, but they do work as expected for titles on the `<a>` tag. The `<abbr>` tag inherits its title attribute from the parent `<a>` tag.

If you are creating HTML code for the definition of **Operating System Dependent Interface**, the meaning of the acronym OSDI, then include a [<dfn> definition tag](#) around the [<abbr> abbreviation tag](#) and follow the entire HTML code for the hypertext link with the definition of the term:

```
<p>A <a href="http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface/" title="Operating System
Dependent Interface"
onclick="if (confirm('OSDI stands for Operating System Dependent Interface')) return false;"
>
<dfn><abbr title="Operating System Dependent Interface">OSDI</abbr>
</a> is ...(definition of Operating System Dependent Interface)....</p>
```

The `<dfn>` tag gets the term being defined from the title attribute of the `<abbr>` tag. The result should look like this (hovering your mouse over the OSDI acronym shows the expanded meaning of the acronym):

A [OSDI](#) is ...(definition of "Operating System Dependent Interface")....

If you are creating HTML code that simply expands the acronym then indicate that it is the OSDI acronym which is being defined using an HTML `<dfn>` tag with a title attribute around the `<abbr>` tag and follow the HTML for the hypertext link with the acronym definition:

```
<p>When we use the acronym <a href="http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface/"
title="Operating System Dependent Interface"
onclick="if (confirm('OSDI stands for Operating System Dependent Interface')) return false;"
>
<dfn title="OSDI"><abbr title="Operating System Dependent Interface">OSDI</abbr></dfn>
</a> it is the abbreviation for Operating System Dependent Interface.</p>
```

Operating System Dependent Interface

The result should look like this (hovering your mouse over the OSDI acronym shows the definition):

When we use the acronym [OSDI](#) it is the abbreviation for Operating System Dependent Interface.

Acronym Vocabulary URI Declaration

For the remaining examples, the Acronym Vocabulary namespace URI needs to be declared for use with element tag names and attribute values. For an HTML web page, the beginning of the file should look like this:

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE html [
<!ENTITY at "http://Acronyms.net/terms/">
<!ENTITY av "http://Acronyms.net/vocabulary/">
]>
<html xmlns="http://www.w3.org/1999/xhtml" xmlns:av="&av;">
<head>
<style type="text/css">
.hide { display: none }
</style>
```

...
This only needs to be done once per document file.

XLink simple link

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a href="http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface/" title="Operating System
Dependent Interface"
xlink:type="simple"
xlink:href="http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface/"
xlink:arcrole="&av;definedAt"
xlink:role="&av;definition"
xlink:title="Operating System Dependent Interface"
xlink:show="new"
xlink:actuate="onRequest"
>
<abbr
xlink:type="simple"
xlink:href="&at;Operating-System-Dependent-Interface"
xlink:arcrole="&av;standsFor"
xlink:role="&av;term"
xlink:title="OSDI - Operating System Dependent Interface"
xlink:show="new"
xlink:actuate="onRequest"
>OSDI</abbr></dfn>
</a>
```

XLink extended link

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a xlink:type="extended" href="http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface/"
title="Operating System Dependent Interface">
<abbr xlink:type="resource" xlink:label="acronym">OSDI</abbr>
<span class="hide" xlink:type="resource" xlink:label="verbal" xlink:title="pronunciation">o s d i</span>
<span class="hide" xlink:type="resource" xlink:label="expand" xlink:title="expansion">Operating System Dependent
Interface</span>
<span class="hide" xlink:type="locator" xlink:label="term" xlink:role="&av;term"
xlink:href="&at;Operating-System-Dependent-Interface" xlink:title="Operating System Dependent Interface"/>
<span class="hide" xlink:type="locator" xlink:label="definition" xlink:role="&av;definition"
xlink:href="http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface/" xlink:title="Operating System
Dependent Interface"/>
<span class="hide" xlink:type="locator" xlink:label="finder" xlink:role="&av;reference"
xlink:href="http://www.Acronyms.net/reference/o/OSDI#Operating-System-Dependent-Interface" xlink:title="OSDI -
Operating System Dependent Interface"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;pronounceAs" xlink:to="verbal"
xlink:actuate="onLoad"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;expandsTo" xlink:to="expand"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;standsFor" xlink:to="term"/>
<span class="hide" xlink:type="arc" xlink:from="term" xlink:arcrole="&av;definedAt" xlink:to="definition"
```

Operating System Dependent Interface

```
xlink:show="new" xlink:actuate="onRequest"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;foundAt" xlink:to="finder"
xlink:show="new" xlink:actuate="onRequest"/>
</a>
```

embedded RDF metadata

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a href="http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface/" title="Operating System
Dependent Interface">
<abbr>OSDI</abbr>
</a>
```

URI Reference for Operating System Dependent Interface

URI Reference for Advanced Webmasters

This page is intended for advanced users, such as developers who are creating XML documents or building Semantic Web sites, who want to code their own simple or extended links, or RDF metadata. For all other purposes, the [HTML hypertext links](#), which show the proper usage of URI References, should be used instead.

In RDF or XML documents, refer to the abstract concept of **Operating System Dependent Interface** using this URI reference:

<http://Acronyms.net/terms/o/Operating-System-Dependent-Interface>

or, declare the &at; entity as shown below and use:

[&at;OperatingSystemDependentInterface](#)

Note that a URI Reference is case-sensitive, and that www. is omitted since it is not intended to be a web-accessible resource.

Use the following URL to refer to the web page that defines this term:

<http://www.Acronyms.net/terms/o/Operating-System-Dependent-Interface>

Examples

Acronym Vocabulary URI Declaration

The Acronym Vocabulary namespace URI needs to be declared for use with element tag names and attribute values. The beginning of an HTML document should look like this:

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE html [
<!ENTITY at "http://Acronyms.net/terms/">
<!ENTITY av "http://Acronyms.net/vocabulary/">
]>
<html xmlns="http://www.w3.org/1999/xhtml" xmlns:av="&av;">
<head>
<style type="text/css">
.hide { display: none }
</style>
```

...

This only needs to be done once per document file.
