

Operating System

Operating System

Operating System

OS Acronym Definition

What does OS stand for?

The acronym **OS** stands for **Operating System** anywhere that links here.

To find other possibilities for the [meaning of OS](#), look up the [OS acronym](#) in the [list of acronyms starting with "O"](#).

If you use this [HTML code for acronyms](#) the intended meaning of the acronym will displayed by a pop-up tool-tip whenever anyone positions their mouse over the acronym. It also indicates to text-to-speech (auditory) browsers how to correctly pronounce the acronym.

For verbal rendering, the [pronunciation](#) of the OS acronym should be:

o s

This information can be provided to auditory browsers using either an [extended link](#) or [embedded RDF metadata](#).

This is an automatically-generated printer-friendly PDF version of the HTML web page at [Operating System](#) ← CLICK HERE to get the standard HTML version of this document.

Operating System Usage

HTML for OS Acronym when OS means Operating System

New! Now updated with the inheritance rules for the [title attribute](#) in [HTML 5](#)

The easiest way to create HTML code indicating that the acronym **OS** stands for **Operating System** is to simply include the acronym in an HTML `<a>` tag and an abbreviation tag (not an [acronym tag](#)):

```
<a href="http://www.Acronyms.net/terms/o/Operating-System/" title="Operating System"
onclick="if (confirm('OS stands for Operating System')) return false;"
>
<abbr>OS</abbr>
</a>
```

This is the recommended code for both HTML 4 browsers and HTML 5 browsers. Some browsers, most notably IE, do not activate help when the title attribute is coded on the `<abbr>` tag, but they do work as expected for titles on the `<a>` tag. The `<abbr>` tag inherits its title attribute from the parent `<a>` tag.

If you are creating HTML code for the definition of **Operating System**, the meaning of the acronym OS, then include a [<dfn> definition tag](#) around the [<abbr> abbreviation tag](#) and follow the entire HTML code for the hypertext link with the definition of the term:

```
<p>A <a href="http://www.Acronyms.net/terms/o/Operating-System/" title="Operating System"
onclick="if (confirm('OS stands for Operating System')) return false;"
>
<dfn><abbr title="Operating System">OS</abbr>
</a> is ...(definition of Operating System)...</p>
```

The `<dfn>` tag gets the term being defined from the title attribute of the `<abbr>` tag. The result should look like this (hovering your mouse over the OS acronym shows the expanded meaning of the acronym):

A [OS](#) is ...(definition of "Operating System")....

If you are creating HTML code that simply expands the acronym then indicate that it is the OS acronym which is being defined using an HTML `<dfn>` tag with a title attribute around the `<abbr>` tag and follow the HTML for the hypertext link with the acronym definition:

```
<p>When we use the acronym <a href="http://www.Acronyms.net/terms/o/Operating-System/" title="Operating
System"
onclick="if (confirm('OS stands for Operating System')) return false;"
>
<dfn title="OS"><abbr title="Operating System">OS</abbr></dfn>
</a> it is the abbreviation for Operating System.</p>
```

The result should look like this (hovering your mouse over the OS acronym shows the definition):

When we use the acronym [OS](#) it is the abbreviation for Operating System.

Acronym Vocabulary URI Declaration

Operating System

For the remaining examples, the Acronym Vocabulary namespace URI needs to be declared for use with element tag names and attribute values. For an HTML web page, the beginning of the file should look like this:

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE html [
<!ENTITY at "http://Acronyms.net/terms/">
<!ENTITY av "http://Acronyms.net/vocabulary/">
]>
<html xmlns="http://www.w3.org/1999/xhtml" xmlns:av="&av;">
<head>
<style type="text/css">
.hide { display: none }
</style>
```

...
This only needs to be done once per document file.

XLink simple link

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a href="http://www.Acronyms.net/terms/o/Operating-System/" title="Operating System"
xlink:type="simple"
xlink:href="http://www.Acronyms.net/terms/o/Operating-System/"
xlink:arcrole="&av;definedAt"
xlink:role="&av;definition"
xlink:title="Operating System"
xlink:show="new"
xlink:actuate="onRequest"
>
<abbr
xlink:type="simple"
xlink:href="&at;Operating-System"
xlink:arcrole="&av;standsFor"
xlink:role="&av;term"
xlink:title="OS - Operating System"
xlink:show="new"
xlink:actuate="onRequest"
>OS</abbr></dfn>
</a>
```

XLink extended link

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a xlink:type="extended" href="http://www.Acronyms.net/terms/o/Operating-System/" title="Operating System">
<abbr xlink:type="resource" xlink:label="acronym">OS</abbr>
<span class="hide" xlink:type="resource" xlink:label="verbal" xlink:title="pronunciation">o s</span>
<span class="hide" xlink:type="resource" xlink:label="expand" xlink:title="expansion">Operating System</span>
<span class="hide" xlink:type="locator" xlink:label="term" xlink:role="&av;term" xlink:href="&at;Operating-System"
xlink:title="Operating System"/>
<span class="hide" xlink:type="locator" xlink:label="definition" xlink:role="&av;definition"
xlink:href="http://www.Acronyms.net/terms/o/Operating-System/" xlink:title="Operating System"/>
<span class="hide" xlink:type="locator" xlink:label="finder" xlink:role="&av;reference"
xlink:href="http://www.Acronyms.net/reference/o/OS#Operating-System" xlink:title="OS - Operating System"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;pronounceAs" xlink:to="verbal"
xlink:actuate="onLoad"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;expandsTo" xlink:to="expand"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;standsFor" xlink:to="term"/>
<span class="hide" xlink:type="arc" xlink:from="term" xlink:arcrole="&av;definedAt" xlink:to="definition"
xlink:show="new" xlink:actuate="onRequest"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;foundAt" xlink:to="finder"
xlink:show="new" xlink:actuate="onRequest"/>
</a>
```

embedded RDF metadata

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a href="http://www.Acronyms.net/terms/o/Operating-System/" title="Operating System">
<abbr>OS</abbr>
</a>
```

Operating System

URI Reference for Operating System

URI Reference for Advanced Webmasters

This page is intended for advanced users, such as developers who are creating XML documents or building Semantic Web sites, who want to code their own simple or extended links, or RDF metadata. For all other purposes, the [HTML hypertext links](#), which show the proper usage of URI References, should be used instead.

In RDF or XML documents, refer to the abstract concept of **Operating System** using this URI reference:

<http://Acronyms.net/terms/o/Operating-System>

or, declare the &at; entity as shown below and use:

&at;OperatingSystem

Note that a URI Reference is case-sensitive, and that www. is omitted since it is not intended to be a web-accessible resource.

Use the following URL to refer to the web page that defines this term:

<http://www.Acronyms.net/terms/o/Operating-System>

Examples

Acronym Vocabulary URI Declaration

The Acronym Vocabulary namespace URI needs to be declared for use with element tag names and attribute values. The beginning of an HTML document should look like this:

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE html [
<!ENTITY at "http://Acronyms.net/terms/">
<!ENTITY av "http://Acronyms.net/vocabulary/">
]>
<html xmlns="http://www.w3.org/1999/xhtml" xmlns:av="&av;">
<head>
<style type="text/css">
.hide { display: none }
</style>
```

...

This only needs to be done once per document file.

XLink Simple Link

```
<link xlink:href="http://www.Acronyms.net/terms/o/Operating-System/" xlink:title="Operating System"
xlink:type="simple"
xlink:href="http://www.Acronyms.net/terms/o/Operating-System/"
xlink:arcrole="&av;definedAt"
xlink:role="&av;definition"
xlink:title="Operating System"
xlink:show="new"
xlink:actuate="onRequest"
>
<abbr
xlink:type="simple"
xlink:href="&at;Operating-System"
xlink:arcrole="&av;standsFor"
xlink:role="&av;term"
xlink:title="OS - Operating System"
xlink:show="new"
xlink:actuate="onRequest"
>OS</abbr>
</link>
```

XLink Extended Link

```
<link xlink:type="extended" xlink:href="http://www.Acronyms.net/terms/o/Operating-System/" xlink:title="Operating
System">
<abbr xlink:type="resource" xlink:label="acronym">OS</abbr>
<span class="hide" xlink:type="resource" xlink:label="verbal" xlink:title="pronunciation">o s</span>
<span class="hide" xlink:type="resource" xlink:label="expand" xlink:title="expansion">Operating System</span>
<span class="hide" xlink:type="locator" xlink:label="term" xlink:role="&av;term" xlink:href="&at;Operating-System"
```

Operating System

```
xlink:title="Operating System"/>
<span class="hide" xlink:type="locator" xlink:label="definition" xlink:role="&av;definition"
xlink:href="http://www.Acronyms.net/terms/o/Operating-System/" xlink:title="Operating System"/>
<span class="hide" xlink:type="locator" xlink:label="finder" xlink:role="&av;reference"
xlink:href="http://www.Acronyms.net/reference/o/OS#Operating-System" xlink:title="OS - Operating System"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;pronounceAs" xlink:to="verbal"
xlink:actuate="onLoad"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;expandsTo" xlink:to="expand"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;standsFor" xlink:to="term"/>
<span class="hide" xlink:type="arc" xlink:from="term" xlink:arcrole="&av;definedAt" xlink:to="definition"
xlink:show="new" xlink:actuate="onRequest"/>
<span class="hide" xlink:type="arc" xlink:from="acronym" xlink:arcrole="&av;foundAt" xlink:to="finder"
xlink:show="new" xlink:actuate="onRequest"/>
</link>
```

RDF metadata

```
<rdf:Description rdf:about="...">
<av:standsFor rdf:resource="&at;OperatingSystem"/>
</rdf:Description>
<rdf:Description rdf:about="...">
