

Video Graphics Array

Video Graphics Array

Video Graphics Array

VGA Acronym Definition

What does VGA stand for?

The acronym **VGA** stands for **Video Graphics Array** anywhere that links here.

To find other possibilities for the [meaning of VGA](#), look up the [VGA acronym](#) in the [list of acronyms starting with "V"](#).

If you use this [HTML code for acronyms](#) the intended meaning of the acronym will displayed by a pop-up tool-tip whenever anyone positions their mouse over the acronym. It also indicates to text-to-speech (auditory) browsers how to correctly pronounce the acronym.

For verbal rendering, the [pronunciation](#) of the VGA acronym should be:

v g a

This information can be provided to auditory browsers using either an [extended link](#) or [embedded RDF metadata](#).

Video Graphics Array Usage

HTML for VGA Acronym

when VGA means Video Graphics Array

New! Now updated with the inheritance rules for the [title attribute](#) in [HTML 5](#)

The easiest way to create HTML code indicating that the acronym **VGA** stands for **Video Graphics Array** is to simply include the acronym in an HTML `<a>` tag and an abbreviation tag (not an [acronym tag](#)):

```
<a href="http://www.Acronyms.net/terms/v/Video-Graphics-Array/" title="Video Graphics Array"
onclick="if (confirm('VGA stands for Video Graphics Array')) return false;"
>
<abbr>VGA</abbr>
</a>
```

This is the recommended code for both HTML 4 browsers and HTML 5 browsers. Some browsers, most notably IE, do not activate help when the title attribute is coded on the `<abbr>` tag, but they do work as expected for titles on the `<a>` tag. The `<abbr>` tag inherits its title attribute from the parent `<a>` tag.

If you are creating HTML code for the definition of **Video Graphics Array**, the meaning of the acronym VGA, then include a [<dfn> definition tag](#) around the [<abbr> abbreviation tag](#) and follow the entire HTML code for the hypertext link with the definition of the term:

```
<p>A <a href="http://www.Acronyms.net/terms/v/Video-Graphics-Array/" title="Video Graphics Array"
onclick="if (confirm('VGA stands for Video Graphics Array')) return false;"
>
<dfn><abbr title="Video Graphics Array">VGA</abbr>
</a> is ...(definition of Video Graphics Array)...</p>
```

The `<dfn>` tag gets the term being defined from the title attribute of the `<abbr>` tag. The result should look like this (hovering your mouse over the VGA acronym shows the expanded meaning of the acronym):

A [VGA](#) is ...(definition of "Video Graphics Array")....

If you are creating HTML code that simply expands the acronym then indicate that it is the VGA acronym which is being defined using an HTML `<dfn>` tag with a title attribute around the `<abbr>` tag and follow the HTML for the hypertext link with the acronym definition:

```
<p>When we use the acronym <a href="http://www.Acronyms.net/terms/v/Video-Graphics-Array/" title="Video
Graphics Array"
onclick="if (confirm('VGA stands for Video Graphics Array')) return false;"
>
<dfn title="VGA"><abbr title="Video Graphics Array">VGA</abbr></dfn>
</a> it is the abbreviation for Video Graphics Array.</p>
```

The result should look like this (hovering your mouse over the VGA acronym shows the definition):

When we use the acronym [VGA](#) it is the abbreviation for Video Graphics Array.

Acronym Vocabulary URI Declaration

Video Graphics Array

For the remaining examples, the Acronym Vocabulary namespace URI needs to be declared for use with element tag names and attribute values. For an HTML web page, the beginning of the file should look like this:

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE html [
<!ENTITY at "http://Acronyms.net/terms/">
<!ENTITY av "http://Acronyms.net/vocabulary/">
]>
<html xmlns="http://www.w3.org/1999/xhtml" xmlns:av="&av;">
<head>
<style type="text/css">
.hide { display: none }
</style>
```

...
This only needs to be done once per document file.

XLink simple link

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a href="http://www.Acronyms.net/terms/v/Video-Graphics-Array/" title="Video Graphics Array"
xlink:type="simple"
xlink:href="http://www.Acronyms.net/terms/v/Video-Graphics-Array/"
xlink:arcrole="&av;definedAt"
xlink:role="&av;definition"
xlink:title="Video Graphics Array"
xlink:show="new"
xlink:actuate="onRequest"
>
<abbr
xlink:type="simple"
xlink:href="&at;Video-Graphics-Array"
xlink:arcrole="&av;standsFor"
xlink:role="&av;term"
xlink:title="VGA - Video Graphics Array"
xlink:show="new"
xlink:actuate="onRequest"
>VGA</abbr></dfn>
</a>
```

XLink extended link

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a xlink:type="extended" href="http://www.Acronyms.net/terms/v/Video-Graphics-Array/" title="Video Graphics
Array">
<abbr xlink:type="resource" xlink:label="acronym">VGA</abbr>
<span class="hide" xlink:type="resource" xlink:label="verbal" xlink:title="pronunciation">v g a</span>
<span class="hide" xlink:type="resource" xlink:label="expand" xlink:title="expansion">Video Graphics Array</span>
<span class="hide" xlink:type="locator" xlink:label="term" xlink:role="&av;term" xlink:href="&at;Video-Graphics-Array"
xlink:title="Video Graphics Array"/>
<span class="hide" xlink:type="locator" xlink:label="definition" xlink:role="&av;definition"
xlink:href="http://www.Acronyms.net/terms/v/Video-Graphics-Array/" xlink:title="Video Graphics Array"/>

</a>
```

embedded RDF metadata

First, [declare the vocabulary](#) as shown above. Then, add acronyms as follows:

```
<a href="http://www.Acronyms.net/terms/v/Video-Graphics-Array/" title="Video Graphics Array">
```

Video Graphics Array

```
<abbr>VGA</abbr>
</a>
```

URI Reference for Video Graphics Array

URI Reference for Advanced Webmasters

This page is intended for advanced users, such as developers who are creating XML documents or building Semantic Web sites, who want to code their own simple or extended links, or RDF metadata. For all other purposes, the [HTML hypertext links](#), which show the proper usage of URI References, should be used instead.

In RDF or XML documents, refer to the abstract concept of **Video Graphics Array** using this URI reference:

<http://Acronyms.net/terms/v/Video-Graphics-Array>

or, declare the `&at;` entity as shown below and use:

`&at;VideoGraphicsArray`

Note that a URI Reference is case-sensitive, and that `www.` is omitted since it is not intended to be a web-accessible resource.

Use the following URL to refer to the web page that defines this term:

<http://www.Acronyms.net/terms/v/Video-Graphics-Array>

Examples

Acronym Vocabulary URI Declaration

The Acronym Vocabulary namespace URI needs to be declared for use with element tag names and attribute values. The beginning of an HTML document should look like this:

```
<?xml version="1.0" encoding="UTF-8"?>
<!DOCTYPE html [
<!ENTITY at "http://Acronyms.net/terms/">
<!ENTITY av "http://Acronyms.net/vocabulary/">
]>
<html xmlns="http://www.w3.org/1999/xhtml" xmlns:av="&av;">
<head>
<style type="text/css">
.hide { display: none }
</style>
```

...

This only needs to be done once per document file.
